BOILER WORLD - AFRICA

Following the grand success of Boiler India, the networking trade fair for the global steam industry is now coming to Africa!

A mix of trade fair and seminars, BOILER WORLD - AFRICA is a global networking & progress-driven platform that brings together the global boiler & allied community under one roof.

3 action-packed days
120+ Exhibitors
8+ Seminars
3000+ Visitors

BOILER WORLD - AFRICA

The future of the steam industry is being built here

The event shall witness leading companies from various industries such as boiler & allied product manufacturers, service providers, engineering & steam solution providers, pharmaceutical, food & beverage, chemical, power generation, sugar, textile, steel, pulp & paper, paint & dyes, refineries, distilleries, etc. With visitors from across continents, this global event will offer an unmatched platform to the exhibitors and visitors, both.

Date:
10th, 11th & 12th August 2023

Venue:
The Kenyatta International Convention Centre,
Nairobi, Kenya

WHO SHOULD EXHIBIT?

- Boiler and component manufacturers
- Turbine and burner manufacturers
- Ancillaries - tubes, pipes, valves, pumps, fans, fittings, joints, plates, measurement & control instruments & equipment
- Technology, service and steam solution providers
- Pressure vessel, heat exchanger, compressor manufacturers
- WTP, ETP & other pollution control equipment manufacturers
- Professionals in NDE, energy audit, RLA and R&M
- Fuel & gas manufacturers/suppliers
- Power tool manufacturers/suppliers
- Material handling and movement equipment manufacturers/suppliers
- Dealers, traders and distributors of material & equipment.

WHY EXHIBIT IN BOILER WORLD - AFRICA?

Merging Borders. Emerging Market. Immersive Opportunities.

1. Boiler manufacturers looking for component & ancillary manufacturers & traders
2. Purchase personnel from boiler-buying industries - pharmaceutical, food & beverage, chemical, power generating, rice, sugar, textile, steel, pulp & paper, paint & dyes, refineries, distilleries, etc.
3. Engineers & operators looking for newer technologies to increase efficiency, safety & environmental protection
4. Investors, bankers, venture capitalists
5. Regulatory authorities, policy makers, urban planning Specialists and utility & energy companies
6. Design engineers, consultants, renewable energy project developers and other service providers
7. Agencies dealing in instrumentation
8. R&D institutions, academicians & students

WHO SHOULD VISIT?

1. Boiler manufacturers looking for component & ancillary manufacturers & traders
2. Purchase personnel from boiler-buying industries – pharmaceutical, food & beverage, chemical, power generating, rice, sugar, textile, steel, pulp & paper, paint & dyes, refineries, distilleries, etc. from across the globe
3. Engineers & operators looking for newer technologies to increase efficiency, safety & environmental protection
4. Investors, bankers, venture capitalists
5. Regulatory authorities, policy makers, urban planning Specialists and utility & energy companies
6. Design engineers, consultants, renewable energy project developers and other service providers
7. Agencies dealing in instrumentation
8. R&D institutions, academicians & students

WHY VISIT BOILER WORLD - AFRICA?

A plethora of unleashed potentials awaits.

- Potential vendors/suppliers across borders
- Geographical diversification in a fast-growing market
- Understanding of market trends, novel developments, changes in market regulations, strategic decision-making parameters, etc.
- Exploration of potential alliance opportunities, mergers, acquisitions, joint ventures
- Exposure to industry trends and latest technologies in an emerging market
- Skill development and employment prospects
- Venturing into new avenues for export revenue
- Immersive opportunities owing to increasing population and consumption in Africa

BOILER WORLD - AFRICA Knowledge Sessions

A holistic guide on African industrial market.

Know it all about Africa's industrial scenario, latest trends & developments, entry barriers and opportunities, manufacturing regulations, skill development opportunities, etc.

Who should attend?

- Professionals from boiler & heat transfer industry
- Steam generators/users
- Career seekers in the boiler/steam industry
- Designers & consultants in heat/steam industry
- Heat exchangers & pressure vessel manufacturers
- Boiler, boiler components and ancillary units manufacturers
- Academia, Government/trade authorities/policy makers
- Inspection authorities
- Testing & certifying agencies
- Water chemistry professionals
- Water treatment plant manufacturers & operators
- Professionals working in the field of effluent treatment, water treatment, ash utilisation & pollution control

Why attend these sessions?

- Opportunity to meet leaders, experts, manufacturers and industry giants
- Exposure to state-of-the-art technological development, facilitating manufacturers to build efficient, cost-effective and environment-friendly boilers
- Opportunity to promote products and services
- For detailed understanding of various international codes such as ASME, ASTM, GHOST, IBR, ANSI, AGA, API, BS, ISO, DIN and more
- To know of practical solutions to common challenges
- Receive expert advice on boiler and boiler component selection
- Exposure to relevant case studies and critical discussions with the industry experts
- Network with Government authorities & technical experts
- Visit BOILER WORLD AFRICA expo at the same venue
